## Experiences

**Developer and Assistant @ Inversiones Diomardi**
July 2020 - Present

- Design, develop and maintain the user interface of the company's web application.
- Propose and implement technological solutions to improve the company's internal processes.
- I established and maintained collaboration through Google Sheets and its API, facilitating joint work.
- I provide technological support in various company environments, ensuring efficiency and adaptability.

**Frontend Developer @ Up work**
February - December 2022

- Created and managed highly responsive static websites with HTML, CSS, JavaScript, React, Tailwind and Bootstrap.
- I optimized the user experience on websites through changes in interface and navigation, maximizing usability and user satisfaction.
- Resolved performance issues on websites, improving loading speed and code efficiency for optimal performance.
- Designed and developed attractive landing pages with HTML, CSS, and visual design techniques to achieve effective and visually attractive landing pages.

## Educations

- Universidad del Valle        Santiago de Cali, Colombia
  Technology in Software Development    2021 – Ongoing
